**FULLY ENGINEERED & BACKED BY A 50 YEAR WARRANTY.**

It is fair to suggest timber is becoming the old fashioned way to build. It allows construction errors to be rectified on site with hammer and nail - easy for the builder but not very reassuring for the homeowner! Unlike other steel and timber framing systems, Supaloc's engineering ensures each component of the frame is unique to your home, manufactured with unparalleled precision and then locked together with patented brackets and connections. There is simply no room for error. By building with this innovative technology you can be sure your home is safer, stronger and more secure. Made with TrueCore steel each Supaloc frame is also backed by a 50 year BlueScope written warranty\*.

**BUILD IT ONCE. BUILD IT RIGHT.**  
INSIST ON SUPALOC STANDARD IN ALL FORMAT HOMES.

**DON'T RISK YOUR BIGGEST INVESTMENT...**

**TERMITE PROOF.**

Termite damage to homes is a very real threat in Australia. Don't be faced with the devastating prospect of rebuilding your home due to damage that can be prevented. Supaloc steel frames, manufactured from TrueCore steel, are 100% termite proof. No if, buts or maybes. When it comes to termite resistance in your home there is no safer option than steel framing. Quite simply, termites can not eat steel frames, so why trust anything else?

**Termite Hazard Map**  
 VERY HIGH MODERATE  
 HIGH NEGLIGIBLE  
 With the threat of termite damage in Australia on the rise you need to seriously consider what's behind the walls of your home! A staggering 1 in every 5 Australian homes suffer termite damage, with repair costs not uncommonly in excess of \$40,000.

**SAFE AND SECURE.**

Supaloc steel frames are safer, stronger and more secure than other framing solutions. Supaloc steel framing possesses a unique strength; it is the only system that attaches each and every component together and bolts them to the slab. The roof is attached to the truss, which is attached to the wall frame, which is attached to the slab. This ensures outstanding wind loading qualities, even in severe storm conditions.

**ECONOMICAL.**

Supaloc steel frames have the potential to save you thousands of dollars in maintenance and chemical termite treatments. Timber frames shrink and expand according to environmental conditions, causing cracks in lining surfaces, peaking of ceiling joints and cracked cornices. In contrast Supaloc is 100% impermeable to termite damage and is riveted and bolted into place ensuring virtually no movement for the life of the home.
